

# Sediment Solutions Development and Coordination of the Community of Understanding

**19th of March 2021**

## **The idea of the Community of Understanding**

Connects professionals of the trilateral Wadden Sea region:

- with different backgrounds and (practical) knowledge
- interested/involved in sediment issues and management

Meant to provide an added value for its participants

Open for everyone as mentioned above

Participants inform each other and learn from each other

The community is the owner of its agenda

The scope could be all aspects of sediment(-management)

- Wadden Sea region, considering both the local and trilateral dimension

Whole scope of sediment management could be discussed

- including the ecological aspects, mud as an asset or a climate adaptation tool

What is a Community of Understanding

## **How to develop into a community**

- Start with ‘the willing’
- Organise events
  - with and for the community (in prep)
  - where members can meet each other
- Gather interesting topics from the participants
- Manage the agenda of the CoU and a postbox for ideas and demands
- Support the organisation of events
- Up to participants to decide if and how they want to proceed
- And what they need for it

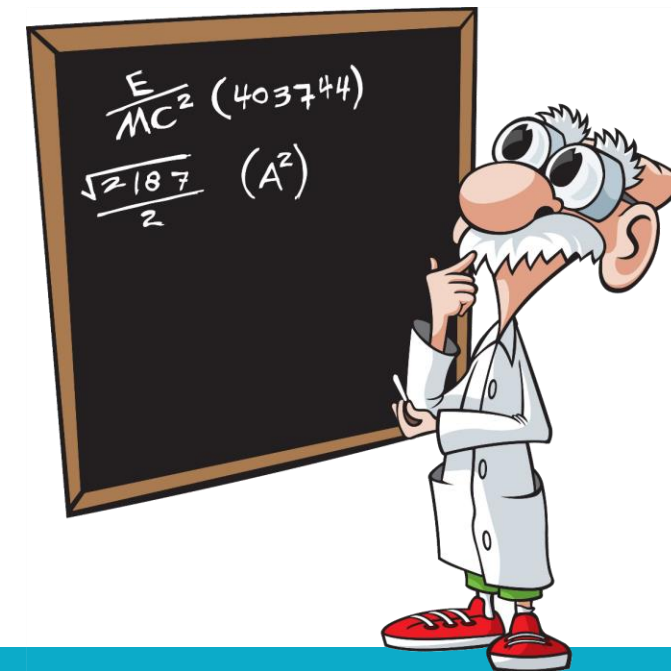

*PRW-support for first steps until 2021*

## Elements for the following steps

- Develop further the added value of a sediment community:  
e.g. a third webinar and/or local excursions in 2021
- Discuss with the participants if they want to proceed and if so, how?
- Organization of activities per tour?  
Bus tour (excursion) planned from **7 to 9 October**.  
e.g. who has something to show/discuss? Results of both webinars?
- Composing an agenda committee?
- Increase young professionals participation. Ideas?
- How to deal with privacy law? Exchange contact details via PRW?

**AGENDA**

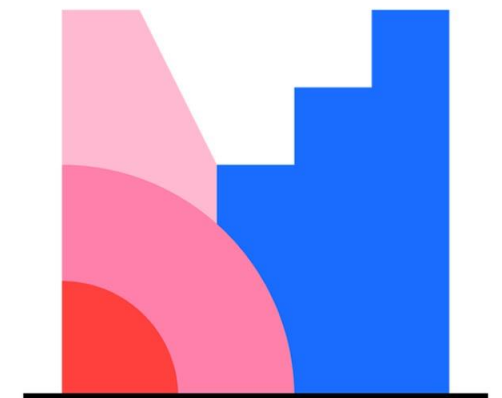

## **Interaction via Mentimeter**

Further inventory of your ideas about development of the Community of Understanding.

- Please go (in browser or other device) to [www.menti.com](https://www.menti.com)
- Enter the code **2620 8341**
- Questions will appear
